* Seed Control Area

In this area all potatoes grown must enter in the form of disease free nuclear stock tissue culture plants and cannot stay in the Pemberton Valley past Class E3 planted.

KEY TO ABBREVIATIONS

N	Nuclear Class
PE	Pre-Elite Class
E1	Elite 1 Class
E2	Elite 2 Class
E3	Elite 3 Class
E4	Elite 4 Class
F	Foundation Class
C	Certified Class

All Nuclear seed potatoes are grown from tissue culture, tested and found free of all known viruses, bacterial ring rot and spindle tuber viroid.

All seed potato lots sold except “certified” are tested and found free of bacterial ring rot.

Seed Potato Certification in Canada

Certification of seed potatoes in Canada is the responsibility of the Canadian Food Inspection Agency. The seed program is based on a limited generation system. The number of field generations is limited to seven. The seed automatically moves down one generation (class) each year. Initially the first generation (Pre-Elite) originates from tested nuclear stock to ensure pathogen freedom. This pathogen freedom is maintained as the seed sequentially moves downward annually and the fields must pass rigorous field inspection. A sample of the plants or tubers in each field are subject to a laboratory test for Bacterial Ring Rot (except Certified class) every year. Seed potato growers participate in a voluntary post harvest test in Hawaii for additional virus readings as established by market demand.

CLASSIFICATION SYSTEM

YEAR IN FIELD	SEED CLASS	GENERATION	REQUIREMENTS
-	Nuclear Seed (N)	-	Produced in an enclosed environment from pathogen free stock
1	Pre-Elite (PE)	1	Grown from N seed
2	Elite 1 (E1)	2	Grown from N or PE seed
3	Elite 2 (E2)	3	Grown from N, PE or E1 seed
4	Elite 3 (E3)	4	Grown from N, PE, E1 or E2 seed
5	Elite 4 (E4)	5	Grown from N, PE, E1, E2, or E3 seed
6	Foundation (F)	6	Grown from N, PE, E1, E2, E3 or E4 seed
7	Certified (C)	7	Grown from N, PE, E1, E2, E3, E4 or F seed

Revision Date: January 2002

- ¹ The purpose of this table is to express equivalency of terms used by various certification agencies for seed potatoes harvested from a series of successive field plantings. For specific criteria relating to disease tolerances and other requirements, the reader is referred to the certification regulations of the agency in question.
- ² The first field planting utilizes laboratory-tested stocks which may be tissue-cultured plantlets, greenhouse-produced mini tubers, stem cuttings, or line selections. Contact agencies for details as to types of stocks planted in their programs.
- ³ Term used by agency for seed potatoes for a particular year in the field: C=Certified, E=Elite, F=Foundation, G=Generation, N=Nuclear, PE = Pre-elite.
- ⁴ If lots originate at Cornell-Uihlein Farm, the first three generations (G1-G3) are also designated by a AU @ to denote source.
- ⁵ Lots NOT originating at the UW Leelah Starks Elite Foundation Seed Potato Farm are designated Gn where n=years in the field.

Tolerance Tables

The maximum percentage of plants in a growing crop planted to produce the various classes of seed at the time of field inspection.

INSPECTIONS

DISEASES	First	Final

Phyto Diagnostics was established in 1996 to provide diagnostic testing services for seed potato growers in Western Canada. Our staff members, former employees of Agriculture and Agri-Food Canada, have research experience in virology, immunology, plant pathology and practical diagnostics.

We are approved by the Canadian Food Inspection Agency (CFIA) to test for bacterial ring rot (BRR), potato viruses including potato mop top virus (PMTV), and potato spindle tuber viroid (PSTVd).

SERVICES OFFERED:

Bacterial Ring Rot (BRR) testing of seed potatoes.

Post-harvest virus testing - greenhouse testing and Hawaii winter tests.

Nuclear stock audits of seed potatoes: BRR, PSTVd, PVX, PVY, PVS, PVM, PVA, PLRV, PotLV & PMTV.

Development and production of monoclonal antibodies, and PCR procedures for plant virus detection.

GMO testing of seed potatoes.

Maintenance of the Western Potato Consortium tissue culture collection, including protected accessions (under Breeders Rights or U.S. Patent Legislation).

Virus eradication for newly submitted accessions.
