The attachment of an official Idaho certification tag to a sack or container of seed potatoes certifies that the potatoes have met the rules and regulations of the Idaho Crop Improvement Association and have been inspected and certified for grade by the Idaho Federal State Inspection Service and found to meet the grade requirements for certified seed at the time of inspection. Since the use of the certified seed potatoes is beyond the control of the Federal State Inspection Service and the Idaho Crop Improvement Association, Inc., no warranty of any kind, express or implied, is made concerning the performance of the seed potatoes.

IDAHO CROP IMPROVEMENT ASSOCIATION'S SOUTH EAST DISTRICT OFFICE, IDAHO FALLS

The Idaho Legislature, at its 35th session, enacted Senate Bill No. 107, the "Seed and Plant Certification Act of 1959". This Act designated the Regents of the University of Idaho, through the College of Agriculture of the University of Idaho, as the seed certifying agency for Idaho. The Act further gave the Regents the authority to designate an agent to administer and conduct the certification program. In 1959, the Regents of the University of Idaho appointed the Idaho Crop Improvement Association, Inc. as their duly authorized agent to administer and conduct seed certification in Idaho.

The Idaho Crop Improvement Association was incorporated in 1941. I.C.I.A. is a non-profit grower association whose membership includes all growers, companies or individuals producing and/or handling Idaho certified seed crops. The Association is governed by a board of nine directors. Seven directors are elected by the membership and represent the seven seed production districts of the state. The eighth director is a member of the Plant, Soil and Entomological Sciences or his/her designee, from the College of Agricultural and Life Sciences, University of Idaho. The ninth director is an individual appointed by the board of directors as an advisor to the board.

In addition to seed potatoes, I.C.I.A. certifies grass, alfalfa, clover, grain, canola, beans and other true-seed crops through its four district offices located in Meridian, Idaho Falls, Dalton Gardens and Twin Falls.

LIMITED GENERATION CERTIFIED SEED POTATOES

Revision Date: December, 2017

¹The purpose of this table is to express equivalency of terms used by various certification agencies for seed potatoes harvested from a series of successive field plantings. For specific criteria relating to disease tolerances and other requirements, the reader is referred to the certification regulations of the agency in question.

²The first field planting utilizes laboratory-tested stocks which may be tissue-cultured plantlets, greenhouse-produced minitubers, stem cuttings, or line selections. Contact agencies for details as to types of stocks planted in their programs.

³Term used by agency for seed potatoes for a particular year in the field: C=certified, E=elite, F=foundation, G=generation, N=nuclear, PE=pre-elite.

⁴If lots originate at Cornell-Uihlein Farm, the first three generations (G1-G3) are also designated by a (U) to denote source.

^{5,6}FY = Foundation Year (Wisconsin), FY = Field Year (Michigan; Maine)

HOW TO USE THIS DIRECTORY

This directory lists those seed potato lots that have been planted with approved planting stocks and have met field inspection requirements. **The data shown are for second field inspections only.** Additional requirements must be met before these seed lots may be represented as or sold as certified seed.

Grower's name and address are listed alphabetically by county and variety. Detailed contact information for each seed grower is available in the back of this directory.

Certification Number. A unique seed lot identification number assigned by Idaho Crop Improvement Association that follows the seed lot throughout the entire certification process. Seed buyers should refer to this number when making inquiries about a seed lot.

Mosaic and Leafroll columns indicate the frequency (percentage) at which these diseases were identified in each seed lot during the **second summer field inspection**, based on a standard plant count of 200 plants per acre. Please note the following explanation of readings:

- 0.0% - indicates that no Mosaic or Leafroll plants were observed during the second field inspection.
- "Trace" - a frequency greater than zero, but less than 0.01% of plants counted.

Acres. This figure indicates the number of acres in the seed lot. Data are rounded to the nearest 0.01 acres.

Class. Idaho uses a limited generation system. Seed class is based on both field generation and disease tolerances. Seed lots not meeting disease tolerances for a particular class during field inspection are downgraded to a lower class. Please refer to the ***"Limited Generation Certified Seed Potatoes"*** chart on the opposite page. Tolerances for seed classes are detailed in ICIA rules for seed potato certification.

PVX Testing. PVX testing of Nuclear, G1, and G2 seed classes is mandatory. This designation indicates that a lot was laboratory tested for Potato Virus X by ELISA and passed the PVX requirement. Absence of the PVX designation in these classes means that a lot exceeded PVX tolerances. PVX tolerances in these seed classes are detailed in ICIA rules for seed potato certification.

Other Abbreviations/Notations:

"See Field Report" – PVX Nuclear and PVX G1 seed classes receive observational inspections. The buyer must check field inspection reports for full information concerning inspection results for these classes.

"EXP" – Experimental Class. Please refer to ICIA Rules of Certification for details.

Disease tolerances for specific seed classes are listed in the current year Idaho Rules of Certification published in May by the Idaho Crop Improvement Association, Inc. Copies are available by contacting the Idaho Falls office at (208) 522-9198 or on line at www.idahocrop.com.

NOTICE TO ALL BUYERS

All seed buyers should be aware of the following:

1. This directory lists the **results of the second field inspection** for those seed potato lots that have been planted with approved planting stocks and have met field inspection requirements. Only seed lots that have successfully met all of the requirements described in the ICIA Rules of Certification and bear official ICIA tags may be represented as or sold as certified seed. Idaho seed potato certification is a process that includes the following requirements:
 - a) Use of approved planting stocks.
 - b) A minimum of two field inspections.
 - c) Storage inspections before and after harvest.
 - d) Post-harvest testing. Post-harvest testing requirements consist of:
 - i. An off-season grow-out of tuber samples in Waiialua, Hawaii. These samples are laboratory tested for PVY and assessed visually for other factors such as PLRV. In certain cases, a laboratory test of tuber sprouts may be conducted in place of the winter grow-out.
 - ii. A laboratory test for bacterial ring rot.
 - e) A Federal-State shipping point inspection to ensure conformity with Idaho Blue, Green or Yellow seed tag grades.
2. Any seed potatoes listed in this directory that do not meet all of the requirements described in the ICIA Rules of Certification will be rejected from certification. They are not certified seed potatoes.
3. Buyers are encouraged to:
 - a) Refer to the ICIA Rules of Certification for information on specific requirements, tolerances, and grade standards. A copy of the ICIA Rules of Certification is available on the ICIA website, www.idahocrop.com, or from the Idaho Falls ICIA office.
 - b) Refer to the official "Certification Number" listed in this directory in all transactions. This is a unique number assigned to each seed lot and it will appear on any documentation that accompanies the seed potatoes purchased.
 - c) Obtain inspection and post-harvest test reports for any seed they plan to purchase. Buyers are strongly encouraged to request a **"North American Plant Health Certificate"** for each seed lot (see the following page). This certificate provides a summary of the seed lot pedigree, inspection and post-harvest test results and seed farm disease history. These certificates are available from either the seed grower or the Idaho Falls ICIA office (with grower's permission).
 - d) Ensure that purchased seed lots have had a shipping point inspection and are properly tagged and sealed. Buyers purchasing certified seed should note the date the potatoes were tagged. Since seed potatoes are a perishable product, neither the Idaho Crop Improvement Association nor the Federal State Inspection Service can assume responsibility for out-of-grade potatoes except for a reasonable period after they are inspected, tagged and sealed.
4. Every reasonable effort has been made to assure the accuracy and completeness of the information contained in this directory. The Idaho Crop Improvement Association, Inc. disclaims any liability for errors or omissions and encourages persons having questions regarding the information to contact the Idaho Falls office.
5. Copies of this directory may be obtained at County Agent offices, by writing the Idaho Crop Improvement Association, Inc., 1680 Foote Drive, Idaho Falls, Idaho 83402, or on line at www.idahocrop.com.

Exclusion of warranty and limitation of remedy. Seed potatoes, certified in accordance with the Idaho Rules of Certification, have been field and grade inspected as specified in the Idaho Rules of Certification. The Idaho Crop Improvement Association and the Federal State Inspection Service function and serve only in an official certification and regulatory manner, respectively, and do not relieve the grower or owner of the grower's or owner's, or eventual buyer's of their responsibility. *Neither the producer, the seller, the Idaho Crop Improvement Association or its employees make any warranty or representation of any kind, expressed or implied, as to the quantity or quality of the crop produced from certified seed, including merchantability, fitness for a particular purpose, or absence of disease, or varietal or selection identity.* The only representation is that the seed potatoes were inspected under the Idaho Rules of Certification.

LINE SELECTIONS (STRAINS)

The Idaho Crop Improvement Association confirms that each lot of potatoes in this directory has met the standards or requirements of the Association, including but not limited to variety name and presence or absence of disease. This directory may also include line selections/varietal strains of certain identifiable varieties, such as Norland and Russet Norkotah or other varieties. Although the certification tag may designate variety, strain or line selection names, that information is derived solely from the documentation supplied by the applicant for certification. Individual seed growers may have developed, or obtained from another source, lines/strains that possess yield, maturity, vine or tuber characteristics that may be different from the variety as originally described and named. A line/strain cannot usually be distinguished from the parent potato variety by conventional certification methods or by laboratory testing. *The seed grower is responsible for informing the seed buyer about line/strain existence and characteristics. Seed buyers should ask seed sellers about lines/strains that may be included among the seed lots listed.*
